

Practical-11

Aim: To compare AI-generated content with student-created content and understand the limitations of AI.

Human-Generated Paragraph

Will AI Replace Jobs or Change Them?

Artificial Intelligence is becoming a major part of our daily lives, and many people are worried that it might replace human jobs. In my opinion, AI will not completely replace jobs but will definitely change the way people work. Some repetitive and simple tasks may be automated, which can reduce the need for manual labour. However, new types of jobs will also be created in areas like data analysis, programming, AI maintenance, and digital services. People will need to learn new skills to work with AI tools. Instead of taking away work, AI will make jobs faster, easier, and more efficient. Humans will still be needed for creativity, decision-making, and teamwork.

AI-Generated Paragraph

Artificial Intelligence is transforming industries by automating many tasks that were previously done by humans. While some jobs may be replaced, AI is more likely to change the nature of work rather than eliminate it completely. Routine activities such as data entry, basic customer support, and repetitive manufacturing can be handled efficiently by AI systems. However, new roles will emerge in fields like machine learning, robotics, cybersecurity, and AI supervision. Instead of removing opportunities, AI will help employees become more productive by reducing workload and improving accuracy. The future will involve humans and AI working together to achieve better results.

Comparison Table (Human vs AI Content)

Human-Generated Content	AI-Generated Content
a) Written in a personal, simple tone.	a) Written in a more formal and polished tone.
b) Shows opinions and personal thoughts.	b) Shows generalized statements based on common knowledge.
c) Uses everyday language and natural flow.	c) Uses structured, professional-style sentences.
d) Reflects personal understanding.	d) Sounds more objective and informational.
e) Less technical vocabulary.	e) More technical and detailed vocabulary.
