

Practical-12

Aim: Create a new NotebookLM project titled “My Chapter Revision Notes”. Upload sources such as PDF notes, web articles, etc. Then generate a combined study guide, flashcards, and concept map, and attach the screenshots.

- **NotebookLM project titled “My Chapter Revision”**

- **Combined Study Guide**

- Flashcards

The screenshot shows the NotebookLM interface with a dark theme. The top bar includes a profile icon, the title 'My Chapter Revision Notes', and buttons for '+ Create notebook', 'Share', 'Settings', and a user icon 'B'. The left sidebar has a 'Sources' section with an 'Add sources' button, a 'Try Deep Research' button, a search bar, and a list of selected sources: 'Computer_Fundame...' and 'Foundations of Com...'. The central 'Chat' pane is titled 'My Chapter Revision Notes' and shows a summary of 2 sources. The right pane, titled 'Studio > App', displays a 'Computing Flashcards' card. The card's question is 'Which characteristic of a computer describes its ability to perform millions of operations per second?'. Below the question is a 'See answer' button. At the bottom of the card are 'Good content' and 'Bad content' feedback buttons. A progress bar at the bottom of the right pane indicates '3 / 55 cards'.

- Concept Map/Mind map
